

Allen Chan; 2020-Apr-22

This is what Allen showed and talked about the story to his parents.

There are a moose and a bird. The legos are so hard to build. It broke so much. And it's cute. The left picture is a moose. The right picture is a bird. They are friends. And it has wings and feet and arms. The wings are brown. They have brown arms too. They have mouths and tongues and teeth. They have super light yellow and orange skin. They look like twins but they are not twins. The moose is me. The bird is my sister. Their eyes are the same too. The feet are yellow. They are hungry now. The eyes are white and black. They have hair all around the skin and wings. The moose and bird are old. They are 73 years old. And they are still walking easily. It's easy to walk. They can sit and run. They can ride bikes, skateboards, tricycles and scooters. They can swim. They are like human. They like to play with each other. The end.

Picture A (moose).

Picture B (bird).
