

# Internet Safety

---

This page lists several activities that provide opportunities to think about and grow your knowledge about being safe online.

## Passwords, Passwords

This activity tests how secure a password might be. As a standard rule, never share your password and this applies here.

Can you come up with a password that is medium or strong? What needs to be done in order to gain a really strong password?

Use these sites and test a number of passwords. Do NOT use your own passwords – remember the standard rule above.

- How Secure is a Password: <https://howsecureismypassword.net/>
- Test Password Strength: <http://www.planetmaggie.com/networksupport/whatyouneed/passwordstrength.aspx>

What did you learn about passwords? What do you need to change in your own passwords in order to ensure that your information is secure?

## Cyberbullying:

When it happens do you know what to do? Check out this video called: Cyberbullying – Short Film by Mighty TripodProds. <https://goo.gl/AoYYWQ>

After watching this video, discuss the lines of communication used to address this issue of bullying. Consider how information is “Amplified” when social media tools are used.

## Be Internet Aware

Check out these activities to see if you can be stumped!
