IRFANVIEW 4.35 – Batch Processing of Images

It is easier to place all the images you wish to convert in one folder. In this example, I have 5 images (note the SIZE).

RESIZE – check

You can set a width/height (640 x 480 is a usual size for web images)

OR choose **Set new size as percentage of original** (this allows a more finite resizing).

Preserve aspect ratio - check

Click **OK**
