

## Garage Band

The 'maker movement' is more than robots or coding or building things. It is a mindset that encourages curiosity and exploration. Seen in roles from engineers to artists, they solve real-world design challenges by inventing and reinventing.

Explore by using gestures to play keyboards, guitars, strings, and drums.

Create music with live loops. Add audio to complete your original song!

### **Start with the Basics:**

Just play! Choose your desired instrument. Practice and record your tune. Choose a different instrument. Practice and record your tune. It will be layered onto your original score.

Social Emotional: What strategies do you need when the music you created doesn't sound the way you wish? Are there words that you can use (eg. Ruler?) to communicate your feelings?
