

# Reverse Google Image Search

Look for related images from the web (from other sites and other image sizes)

## Upload a Picture

1. On your computer, open Chrome or Safari.
2. Go to <https://images.google.com>
3. Click **Search by image**
4. Click Upload an image → **Choose file** or **Browse**.
5. Select the image from your computer.
6. Click **Open** or **Choose**

## Drag and Drop a Picture (must use Chrome or Firefox for this option)

1. Open Chrome or Firefox on your computer.
2. Go to <https://images.google.com>
3. On your computer, find the image you want to search with.
4. Click on the picture.
5. Hold down the mouse, drag the picture, and then drop it into the search box.

## Search with a URL

1. Open Chrome or Safari.
2. Go to the website that has the picture you want to use.
3. To copy the URL, right-click on the picture.
4. Click “Copy image address”.
5. Next, go to <https://images.google.com>
6. Click “Search by image”.
7. Click “Paste image URL”.
8. Paste the URL in to the text box.
9. Click “Search by image”.

## Search with a Picture from a Website

1. Open the Chrome browser on your computer.
2. Go to the website that has the picture you want to use.
3. Right-click on the picture.
4. Click “Search Google for image”. You will see your results in a new tab.
