

Taking a Airplane Trip

When we go somewhere that is far away,
we might need to get there on a airplane.
Riding on a airplane is a fast way to get
somewhere far away.

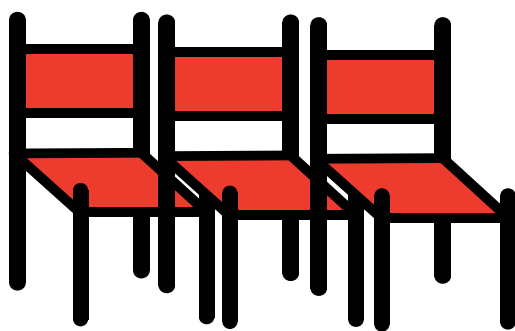

wait

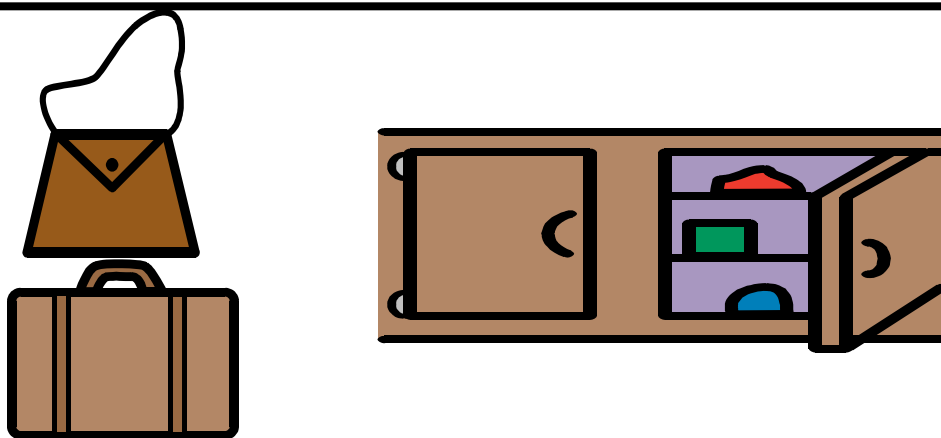

We usually have to get to the airport and wait. We might need to wait quite awhile for our turn to get on the airplane.

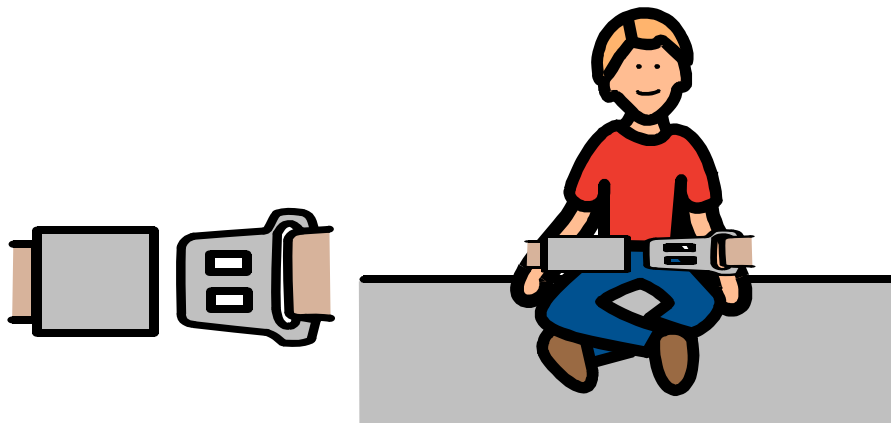

Airports are a busy place. There are lots of people who are waiting for their airplanes.

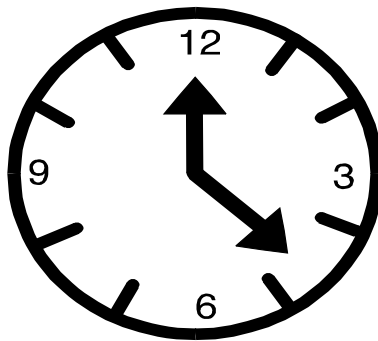

When it is time to get on the airplane, someone will take our tickets. Then we need to walk on to the airplane and find our seats.

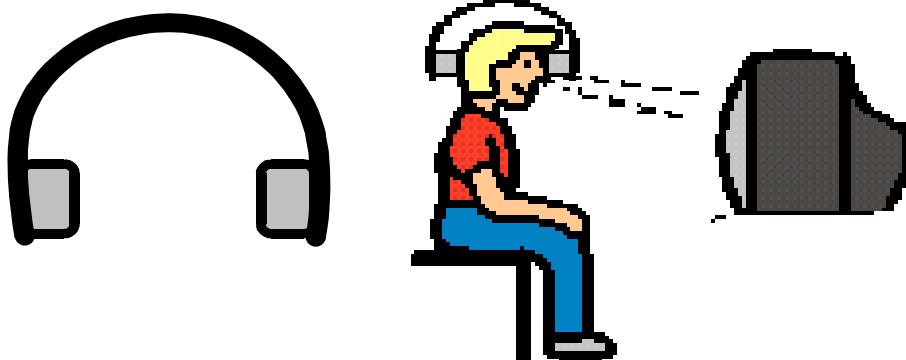

We might have some luggage to put in the overhead compartment.

I should sit down, put my seatbelt on and try to relax.

My airplane ride might take a long time.

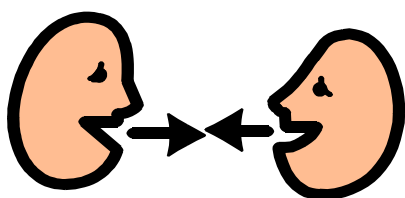

Sometimes airplanes have earphones. You can watch a movie with the earphones on, or you might want to listen to music. This should be fun.

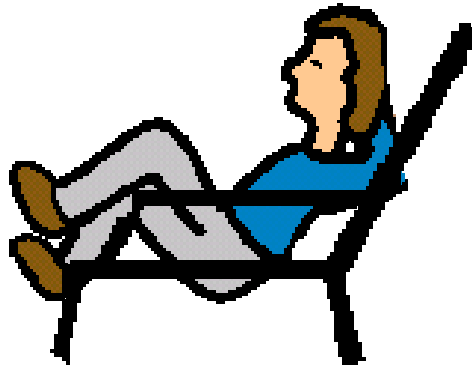

talk

or

read

I can talk or read a book or magazine on an airplane.

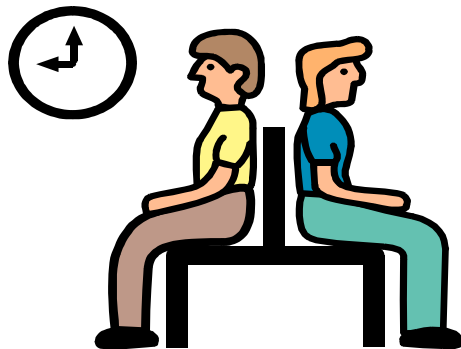

If I feel tired I could close my eye and rest.

Airplanes make noises. I might hear the noise of the engine or the noise of the wheels going up and down.

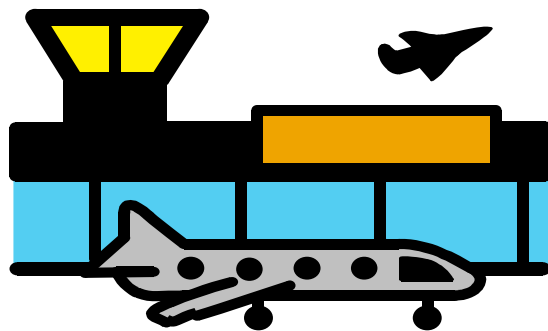

wait

When we are getting ready to land there might be some loud noises.

When the airplane lands we will collect all our things and wait our turn to get off the airplane.

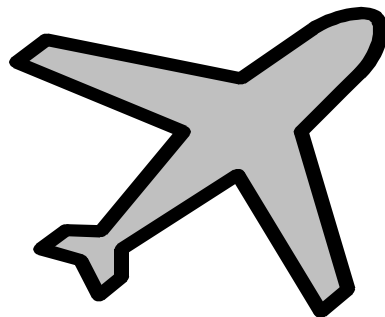

airport

city

When we get off the airplane we will be in another city.

Riding on airplanes can be fun.
