

Civilizations from Scratch

“The stage of human social development and organization that is considered most advanced.”

Your task is to create a civilization based on your fallen leader. You must elaborate on the sections below in any manner you see fit (other than the geographic location which must be mapped in some form). You will then follow the specifics in each run down provided. You **MUST** include a visual of some sort to show the appearance of your people and their values. Please attach the slam poem into this folder at the end as well. Best of luck creators!

Things that you need:

A geographic location/ description: A map of some kind either drawn, rendered or created that shows the layout of your civilization.

Government/ Legal system: Define your government system (How it runs, who runs it and how you divide it). Demonstrate the structure of the legal system and some of the more pertinent laws.

Social Life: Describe in various forms the following practices in detail: Food, leisure, education, art, writing, religion, etc.

Monetary System/ Economic Structure/ Property: *Explain and Elaborate on the following:* Taxation, Class Structure, Monetary Distribution, Surplus.

Military: Describe how your civilization deploys military, what were their tactics, did they fight often? At all? How were they funded? etc.

Science/ Technology: Create a case study/advancement that is being conducted in Science by your civilization. Also explain any developments of technology by your civilization.

People: Describe and create a visual of your people to see what the average person (or being) looked like during the reign of your civilization. Elaborate as you see fit.
